

SUBJECT SPOTLIGHT

**CARDINAL
NEWMAN
COLLEGE**

To get a real insight into what studying A-Level Maths at Newman is really like, we decided to ask one of our Year 13 Maths students, Jessica Walsh what she thinks of studying Maths!

WHY DID YOU CHOOSE TO STUDY MATHS AT NEWMAN?

I decided to study Maths as it was a subject I really enjoyed at High School and then I did well and got a good grade in it at GCSE. Maths is also a requirement for a lot of degrees at university, so I thought it would provide me with more options when I leave College too.

WHAT OTHER SUBJECTS DO YOU STUDY?

I do Maths, Further Maths and Physics.

WHAT IS YOUR FAVOURITE THING ABOUT STUDYING MATHS?

I love that it is a very logical subject, but also that there are no big essays to write as that's not my favourite thing to do!

WHAT IS THE BEST THING ABOUT MATHS AT NEWMAN?

It is great, because there are lots of resources to use such as Curriculum Plus sessions, which are additional study support sessions, run by your teachers to give you any extra help if you need it. The teachers are always on hand to offer help and support to all their students.

DO YOU HOPE TO USE YOUR MATHS FOR YOUR FUTURE CAREER?

Yes, as I am planning to go to university to study a degree in Civil Engineering.

WHAT WOULD YOU SAY TO SOMEONE WHO IS CONSIDERING STUDYING MATHS AT A-LEVEL?

If you are considering studying Maths at A-Level, I would recommend that you have a look at degrees or careers that you might be interested in in the future and check what subjects they require.
